Focused on Capital Management

The chart below shows the dividends and franking credits received from a \$10,000 investment in BKI at inception versus bank quarterly interest. An investor who spent the equivalent of \$10,000 to purchase BKI shares upon listing in December 2003 would now be receiving fully franked dividends of \$1,305pa. The franking credits enhance the income by a further \$559, assuming a tax rate of 30%. The same investment in a term deposit (based on the cash rate + 0.50%) would be earning \$365pa with no franking credits.

This chart highlights the opportunity of receiving a fully franked dividend in a falling interest rate environment.
