# Focused on Capital Management

The chart below shows the dividends and franking credits received from a \$10,000 investment in BKI at inception versus bank quarterly interest. An investor who spent the equivalent of \$10,000 to purchase BKI shares upon listing in December 2003, and who participated in all of the Company's DRP's would now be receiving fully franked dividends of \$2,034pa. The franking credits enhance the income by a further \$872, assuming a tax rate of 30%. The same investment in a term deposit (based on the cash rate + 0.50%) would be earning \$484pa with no franking credits.

Source: Contact Asset Management, Factset. Portfolio Performance is measured by change in pre-tax NTA and is after all operating expenses, provision and payment of both income and capital gains tax and the reinvestment of dividends. TSR include reinvestment of dividends. TSR including franking credits are based on BKI's dividends being fully franked. Past performance is generally not indicative of future performance.
