Financials and Materials 1 Year Performance

Recent stimulus announcements from The Peoples Bank of China, as well as the Federal Reserve's 0.50% interest rate cut has seen a significant rally in resources and commodity prices.

Portfolio Positioning – Banks/Financials

As at 30 September 2024

Appreciating share prices in Banks and Financials has seen BKI's weighting to this sector increase over the year.

With projected super assets in Australia forecast to grow to \$10 trillion by 2040, a growing population, significant market share and robust financial strength, we expect to see ongoing support for Australian Banks.

We continue to believe that Australian Banks are great long-term investments.

Portfolio Positioning – Resources/Energy

As at 30 September 2024

Declining share prices in Resources and Energy has seen BKI's weighting to these sectors reduce over the year.

The future energy transition will lead to a significant increase in the demand for critical minerals and we continue to see investment in upstream Oil, LNG and Thermal Coal to ensure today's energy requirements are met.

We continue to believe in the Energy thematic and our investments within the sector.
